Designs and Development Projects

Below mentioned are my recent designs and development projects that I have made during my college, few of them are made in assistance with my teammates. The projects include analysis of problem, research & survey and real time solution for them.

Dec 2019

Relocation Of Immigrants(CAA)

Basically in this project we developed an online web application where a database of Immigrants can be stored & and they are allocated a state based on standard parameters.

In this project I looked after the UI/UX design and assisted in development of database.

March 2020

ROI enhancement with Data Structures

Basically it is the enhancement in ROI here I added additional features to the project related to Searching and Sorting of Immigrants from the database efficiently.

May 2020

Dryp

I designed the UI/UX for a fitness assessment app. This app basically assess a person's Flexibility, Strength and Focus.

Aug 2020

To-Do List Based on Human Emotions

Basically this app is a outcome of a 3 member team where I worked as researcher, planner and Full stack designer. This app is basically based on a psychology research paper where we focus on colour psychology and two way interaction between the human and app.
